

Topic Guides for

**NOBODY EVER TOLD ME (OR MY MOTHER) THAT!
EVERYTHING FROM BOTTLES AND BREATHING TO HEALTHY SPEECH DEVELOPMENT**
By Diane Bahr (Sensory World, 2010)

The topic guides help you **quickly and easily** access the information you need in this **comprehensive child development manual**. Your child did not come with a manual. Therefore, you need a ready reference.

The first guide addresses feeding, speech, and mouth development from birth. The second guide addresses health concerns, finding professional help, and children with special needs. The topics are listed sequentially as they are found within the book.
